*GIT & GITHub: GIT Merge*

# ***GIT & GITHub : Version Control System***

.....

- Isolating **features** into different branches is a crucial practice for any serious developer.
- At some point, a piece of code will reach a state where you'll want to integrate it with the rest of the project. This is where the **git merge** command comes in.

*Will see you in Next Lecture...*

---

*Thank you!*

A close-up photograph of a hand holding a black marker, completing the word 'Thank you!' in a cursive script on a white surface. The hand is positioned on the right side of the frame, with the index and thumb fingers visible, holding the marker. The marker is black with a silver band. The text 'Thank you!' is written in a fluid, cursive style, with the exclamation mark being the final stroke. The background is a plain, light-colored surface.
